

PU foam cans (emptied - without special items) - resources potential

Product recipient:
PDR Recycling, D-Thurnau
www.pdr.de

PRODUKTE DURCH RECYCLING

Raw material potential:
- preparation for reuse
- material recycling

Energetic potential:
- production of a substitute
combustable
- energetic recovery

Disposal:
- landfill
- incineration
- losses

Most important output flows

Raw material potential:

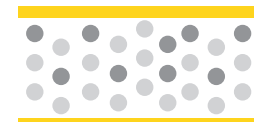

Iron

fuel gas

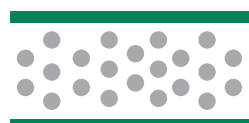

Energetic potential:

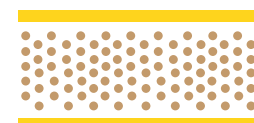

PU waste

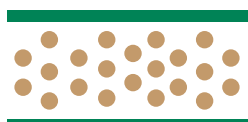

non-ferrous metals

foam component

PU mixed waste (labels)

cardboard
