

# Roofing - Resources potential

Product recipient :  
Recyfuel, B-Engis  
www.rycfuel.be

+

Wood chips (necessary for the production of the substitute fuels)

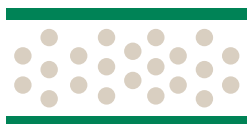

- Raw material potential:
  - preparation for reuse
  - material recycling

- Energetic potential:
  - production of a substitute combustable
  - energetic recovery

- Disposal:
  - landfill
  - incineration
  - losts

## Most important output streams

Raw material potential:

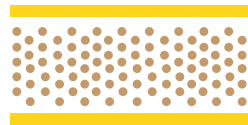

Aluminium part made of Resofuel

Energetic potential:

Resofuel (Substitute fuel)

Plastifuel (Substitute fuel)
