

# Cooking oils and greases (heating) - resources potential

Product recipient:  
SuperDrecksKëscht ®-Zentralheizung  
www.sdk.lu

- Raw material potential:
  - preparation for reuse
  - material recycling

- Energetic potential:
  - production of a substitute combustable
  - energetic recovery

- Disposal:
  - landfill
  - incineration
  - losts

## Most important output streams

Energetic potential:

Purified fat (no DIN standard quality)

Disposal:

Residues, soot, pollution, contaminants
